EXAMINER

MANIWANG, JOSEPH R

ART UNIT

PAPER NUMBER

2144

DATE MAILED: 04/20/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/090,556	Applicant(s) BAZINET ET AL.	
	Examiner Joseph R. Maniwang	Art Unit 2144	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 April 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,4-16,18,19,21,22,25,26,28,30,33-45,47,48 and 50 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,4-16,18,19,21,22,25,26,28,30,33-45,47,48 and 50 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/03/06 has been entered.

Claim Rejections - 35 USC § 102

3. Claims 1, 4-16, 18, 19, 21, 22, 25, 26, 28, 30, 33-45, 47, 48, and 50 rejected under 35 U.S.C. 102(e) as being anticipated by Polizzi et al. (U.S. Pat. No. 6,643,661).
4. Regarding claims 1, 22, and 30, Polizzi disclosed a method and system for implementing security features at a portal server comprising receiving a first request from a client (see column 5, lines 1-17); in response to receiving the first request, authenticating the client (see column 5, lines 35-61; column 23, lines 2-24); consulting a database to determine access privileges of the authenticated client for interactions with a plurality of applications, wherein the applications are located at backend servers (see

Art Unit: 2144

column 5, lines 35-61; column 23, lines 2-24); generating code containing selectable interactions with the applications, wherein any authentication for the selectable interactions can be performed within the portal server (see column 4, lines 8-25; column 5, lines 45-47); sending the code to the client (see column 8, lines 1-5; column 23, lines 25-46); responsive to sending the code to the client, receiving a second request from the client, wherein the second request contains a selection of at least one of the selectable interactions (see column 2, lines 9-11; column 4, lines 5-8; column 5, lines 1-17; column 23, lines 47-59); determining from the selection a set of backend servers to process the second request (see column 23, lines 65-67); forwarding the second request to the set of backend servers (see column 24, lines 8-11); receiving results corresponding to the request from applications executing on the backend servers (see column 24, lines 12-16); and sending the results to the client, wherein sending the results to the client further comprises generating further selectable interactions (see column 24, lines 17-36); and sending the further selectable interactions with the results to the client (see column 24, lines 17-36).

5. Regarding claims 4 and 33, Polizzi disclosed the method and system wherein the portal server is a Web server and the portal server comprises a portal application (see column 8, lines 1-54).

6. Regarding claims 5, 25, and 34, Polizzi disclosed the method and system wherein the database comprises a plurality of generic objects, wherein each generic object contains the access privileges related to a user for the elements of the plurality of applications (see column 5, lines 43-47; column 23, lines 1-24).

Art Unit: 2144

7. Regarding claims 6 and 35, Polizzi disclosed the method and system wherein the access privileges indicate write access (see column 8, lines 39-54).
8. Regarding claims 7 and 36, Polizzi disclosed the method and system wherein the database is in the form of a table (see column 5, lines 35-61; column 23, lines 2-24).
9. Regarding claims 8 and 37, Polizzi disclosed the method and system wherein the code is in a form that can be rendered into a Web (see column 8, lines 1-17).
10. Regarding claims 9 and 38, Polizzi disclosed the method and system wherein the form of the code is comprised of active code, wherein the active code can be executed on the client (see column 8, lines 1-17).
11. Regarding claims 10 and 39, Polizzi disclosed the method and system wherein the selectable interactions correspond to operations within the applications (see column 4, line 44 through column 5, line 17).
12. Regarding claims 11 and 40, Polizzi disclosed the method and system wherein the selectable interactions correspond to resource related to the applications (see column 4, line 44 through column 5, line 17).
13. Regarding claims 12 and 41, Polizzi disclosed the method and system wherein the resources are selected from the group consisting of multimedia content, objects, files, attributes of objects, program elements, database objects, table entries (see column 4, line 44 through column 5, line 17).
14. Regarding claims 13, 26, and 42, Polizzi disclosed a method and system comprising creating data structures corresponding to interactions with the backend application (see column 4, lines 8-25; column 5, lines 45-47); associating privileges for

Art Unit: 2144

each of the data structures, wherein the privileges can be fully checked at a portal application separately hosted from the backend application (see column 5, lines 35-61; column 23, lines 2-24); receiving a request from the portal application for reading the data structures (see column 6, lines 34-58); and sending the data structures to the portal application, wherein the interactions are operations that can be performed on the backend application and on resources related to the backend application, and wherein the backend application, the operations that can be performed on the backend application, and the resources related to the backend application are displayed on a single Web page on a client (see column 8, lines 1-54).

15. Regarding claims 14, 27, and 43, Polizzi disclosed the method and system further comprising receiving a request for an interaction with the backend application from the portal application (see column 5, lines 1-17); processing the request without checking for privileges (see column 5, lines 43-59); and sending the results of processing the request to the portal server (see column 5, lines 1-17).

16. Regarding claims 15 and 44, Polizzi disclosed the method and system wherein the data structures are data objects (see column 5, lines 61-67).

17. Regarding claims 16 and 45, Polizzi disclosed the method and system wherein a representation of the data structure is from the group consisting of a relational database, and XML document and a class (see column 4, lines 19-25; column 5, lines 61-67).

Art Unit: 2144

18. Regarding claims 18 and 47, Polizzi disclosed the method and system wherein the interactions relate to resources associated with the background application (see column 4, line 44 through column 5, line 17).

19. Regarding claims 19, 28, and 48, Polizzi disclosed a method and system comprising authenticating with a portal server (see column 5, lines 35-61; column 23, lines 2-24); receiving a list of applications and interactions that can be performed with the applications from the portal, wherein the applications are stored at backend servers that are different from the portal server (see column 8, lines 1-5; column 23, lines 25-46); selecting an interaction (see column 4, lines 21-25); and receiving results based on the selection of the interaction without authenticating with the backend servers, wherein receiving the results further comprises receiving a set of further interactions selectable by the client computer, wherein the portal server performs all necessary authentications of the client computer, and wherein the backend servers avoid any authentication of the client computer (see column 24, lines 17-36).

20. Regarding claims 21 and 50, Polizzi disclosed the method and system wherein authenticating, receiving the list, selecting, and receiving results are at a Web browser (see column 4, lines 15-25).

Response to Arguments

21. Applicant's arguments with respect to claims 1, 4-16, 18, 19, 21, 22, 25, 26, 28, 30, 33-45, 47, 48, and 50 have been considered but are moot in view of the new ground(s) of rejection. Examiner submits that the newly amended claims limitations are

Art Unit: 2144

taught by the prior art of record as detailed in the above rejection under 35 U.S.C. 102(e). In general, Polizzi teaches the claim limitations argued by Applicant such as "sending the further selectable interactions with the results to the client, where the results were received by the portal server from an application executing on the backend servers" (see column 24, lines 17-36), "the operations that can be performed on the backend application are displayed on a single Web page" (see column 8, lines 1-54), "the portal server performs all necessary authentications of the client computer, and wherein the backend servers avoid any authentication of the client computer" (see column 5, lines 35-61; column 23, lines 2-24), and "receiving a request for an interaction with the backend application from the portal application" (see column 4, lines 21-25).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Inala et al. (U.S. Pat. No. 6,199,077)

Fisher (U.S. Pat. No. 6,957,199)

Rajan et al. (U.S. Pat. No. 6,725,425)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph R. Maniwang whose telephone number is (571) 272-3928. The examiner can normally be reached on Mon-Fri 8:00-4:30.

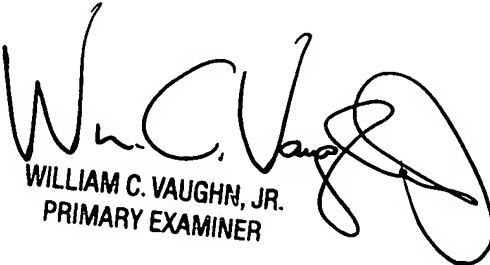

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William C. Vaughn can be reached on (571) 272-3922. The fax phone
